

Submission from Johnston Gray

I am writing to support the Footway Parking and Double Parking (Scotland) Bill. I believe no vehicles should be allowed to park on footpaths, this causes people to have to walk onto the roads with traffic, that cannot be right, our people should be safe while out walking, but at this time it is not, I don't see why vehicle owners should be allowed to protect their cars etc. while putting people including elderly and children.

My own child was involved in accident due to this parking practice. And since then I never let her walk to her friends nearby or walk to school because of this incident. Therefore I hope our Scottish Parliament passes this bill as soon as possible.
